

ARE YOU CONCERNED WITH YOUR CHILD'S OR YOUR LISTENING SKILLS?

We at Macquarie University invite you to participate in this study assessing hearing and listening skills. We are looking for children, teenagers and adults aged 10 – 30 years with concerns regarding their hearing, listening or reading skills. This study will help us understand the difficulties that children face when listening in noisy environments and ways to help them.

You will receive: A comprehensive report, \$ 30 for each session (\$60 total), reimbursement for parking and travel expenses (\$20) = Total \$ 80.

All our tests involve listening to some sounds and are fun and exciting for everyone.

Two sessions of 3 hours each will be held in the auditory neuroscience laboratory at the University of Sydney. The sessions include breaks as well.
